# Week 1 & 2

Felipe Rodriguez

2023-12-15

```
setwd("/Users/feliperodriguez/OneDrive - Bellevue University/DSC 640 Data Prep and Vis/Week 3&4")
data <- readxl::read_excel("world-population.xlsm")
```

Plot the data from each dataset using a scatter plot.

```r
# Line Chart
library(ggplot2)
ggplot(data=data, aes(x = Year, y =`Population`)) + geom_line(color="blue") + ggtitle("Line Chart - R")
```

```r
# Step Chart
library(ggplot2)
ggplot(data=data, aes(x = Year, y =`Population`)) + geom_step(color="blue") + ggtitle("Step Chart - R")
```

Step Chart – R
